Download The Dataset

- ❖ Collect images of different food items organized into subdirectories based on their respective names as shown in the project structure.

- ❖ Create folders of types of food items that need to be recognized.
- ❖ In this project, we have collected images of 5 types of food items 'apples', 'banana', 'orange', 'pineapple' and 'watermelon', they are saved in the respective subdirectories with their respective names.

- ❖ For more accurate results we can collect images of high resolution and feed the model with more images.

- ❖ For more accurate results we can collect images of high resolution and feed the model with more images.

- ❖ You can download the dataset used in this project using the link below
